ACCC APPLICATION UPDATE

BSC is pleased to let you know that our application for authorisation is proceeding well.

The ACCC received 8 submissions in response to their public consultation process, most of which were supportive and in addition to the 47 supporting letters provided with the submission demonstrate broad support.

A number of issues or concerns were raised in the submissions which were either not sufficiently clear in the BSC proposal or had been considered and rejected in the earlier consultation and design process and therefore not addressed in the submission. BSC has prepared a response to those 8 submissions addressing each of the issues raised.

The 8 submissions have been published on the ACCC website and our response will be published shortly.

The ACCC have advised that they anticipate issuing their draft decision this month. We anticipate further communications with members upon receipt of their draft decision. Stay tuned!
